

## Prepare your home for emergencies

### **You can't predict when an emergency strikes, but you can be prepared.**

Sudden cardiac arrest (SCA) can happen to anyone, anywhere. A victim's chance of survival dramatically decreases for every minute without treatment.<sup>1</sup> The most common place for an out-of-hospital cardiac arrest (OHCA) to occur is in a residential setting, with 74% of events occurring in a home.<sup>2</sup>

Access to automated external defibrillators (AEDs), high-quality CPR and quick treatment is vital for better patient outcomes. Making sure your home is emergency ready, is the first step to protecting your loved ones.

# Help protect your loved ones

## The risks to your family are just too great to be without an AED in your home:

- 350K out-of-hospital cardiac arrests per year<sup>3</sup>
- 74% out-of-hospital cardiac arrests happen in the home<sup>2</sup>
- 10% survival rate of SCA<sup>4</sup>
- After four minutes, chance of survival decreases 10% for every minute without treatment<sup>5</sup>

## HeartSine® samaritan® PAD 350P

Designed for your home, the HeartSine samaritan PAD 350P (SAM 350P) tells you exactly what to do in a cardiac emergency. Visual and verbal prompts guide you through the entire resuscitation process, so you don't need to be an expert.

The SAM 350P can be used on adults or children (from 1 years of age) and doesn't require a prescription from your doctor.

### Easy to use

Proven to be easy to set-up, use and maintain using simple-to-follow instructions and self-training videos.

### Use on adults and children

Pediatric-Pak, for use with the SAM 350P AED, is the only FDA-approved pediatric electrode pad cartridge approved for use on children (between 1 and 8 years) without a prescription.

### Two-button operation

Simple to operate with just an On/Off button and a Shock button.

### Highly portable

With its compact size and light weight (only 2.4 lb), it can be stored at home or taken on the go.

### High level of protection from dust and water

IP56 rating means you can defend your AED from dust and water with the highest level of protection in the industry.

### Two parts, one expiration date

The innovative Pad-Pak, an integrated battery and electrode single-use cartridge with one expiration date, offers one simple maintenance change every four years.

### Low cost of ownership

Shelf life of four years means that the Pad-Pak may offer savings over other defibrillators that require separate battery and electrode replacements.

### 8-year warranty

Backed by an 8-year limited warranty.

### Forward Hearts

A sudden cardiac arrest survivor, rescued in your home by a lay-user using a HeartSine samaritan PAD, may be eligible to donate an AED to the organization of their choice.<sup>6</sup>

## A trusted legacy

Working in partnership with our customers, Stryker develops technologies and devices to give the public, first responders and hospitals more control during a critical event. Our uncompromising commitment to quality means product performance you can count on. Because in critical situations, you deserve the very best lifesaving tools.

## Emergency Care Public Access

AED users should be trained in CPR and in the use of the AED. Although not everyone can be saved, studies show that early defibrillation can dramatically improve survival rates. AEDs are indicated for use on adults and children. AEDs may be used on children weighing less than 25 kg (55 lb) but some models require separate defibrillation electrodes.
